# EXPERIENCE

- **2019-2022**

  **GLOBEXIT Full-stack developer (remotely)**

  STACK: HTML5, JS, JQUERY, REACT, MSSQL, XML, HTML LETTERS
  PROJECTS:
  I took part in implementing 3 projects in the financial and energy extraction spheres during my work. I have also supported some already existing projects.

  MY RESPONSIBILITIES:
  - Develop and maintain web applications;
  - Collaborate with other developers and designers to deliver high-quality products;
  - Participate in code reviews and ensure code quality;
  - Identify and troubleshoot performance bottlenecks and bugs;
  - Task estimation and requirements discussion;
  - Supporting and maintaining existing projects;
  - Interacting with clients and the client-side team to discuss requirements and resolve issues;
  - Assisting in the hiring process and onboarding of new team members.

- **2018-2019**

  **IT Academy Trainee**

  I successfully developed some projects during the course.
  - Project online shop with technologies HTML, CSS, and jQuery.
  - Project SPA named MATH APP with technologies HTML, CSS, and JavaScript.
  - Project SPA named Dove. It seems like Tinder. I used such technologies like React, Redux, Ajax, Node.js, MongoDB
